U1117 Data Sheet

V 1.2

版权归浙江宇力微新能源科技有限公司

Features

- Maximum output current is 1.4A
- Range of operation input voltage: Max 15V
- Line regulation: 0.03%/V (typ.)
- Standby current: 2mA (typ.)
- Load regulation: 0.2%/A (typ.)
- Environment Temperature: -40°C~85°C

Applications

- Power Management for Computer Mother Board, Graphic Card
- LCD Monitor and LCD TV
- DVD Decode Board
- ADSL Modem
- Post Regulators For Switching Supplies

General Description

U1117 is a series of low dropout three-terminal regulators with a dropout of 1.3V at 1A load current. U1117 features a very low standby current 1.8mA compared to 5mA of competitor.

U1117 is a fixed-output version, providing outputs of both 3.3V and 5.0V.

U1117 offers thermal shut down function, to assure the stability of chip and power system. And it uses trimming technique to guarantee output voltage accuracy within 2%. Other output voltage accuracy can be customized on demand, such as 1%.

U1117 is available in SOT89 power package.

Typical Application

Application circuit of U1117 fixed version

Pin configuration

SOT89

Pin NO.	Symbol	Decription
1	GND	Ground
2	VOUT	Output Voltage
3	VIN	Input Voltage

Typical Electrical Characteristic

U1117 Vout.Vs.TEMP

Ordering Information

Marking	Designator	Description
7110 33 YYWW	7110	Product code
	33	Output Voltage (3.3V)
	YYWW	DATE CODE

Block Diagram

Detailed Description

U1117 is a series of low dropout voltage, three terminal regulators. Its application circuit is very simple: the fixed version only needs two capacitors to work. It is composed of some modules including start-up circuit, bias circuit, bandgap, thermal shutdown, power transistors and its driver circuit and so on.

The thermal shut down modules can assure chip and its application system working safety when the junction temperature is larger than 140°C.

The bandgap module provides stable reference voltage, whose temperature coefficient is compensated by careful design considerations. The temperature coefficient is under 100 ppm/°C. And the accuracy of output voltage is guaranteed by trimming technique.

Typical Application

U1117 has an adjustable version and six fixed versions (3.3V , 5.0V)

Application circuit of U1117 fixed version

- 1) Recommend using 10uF tan capacitor as bypass capacitor (C1) for all application circuit.
- 2) Recommend using 10uF tan capacitor to assure circuit stability.
